Dan,

The report for Eberline Work Order 14-01322 was revised due to a lab error regarding the aliquot volume. This is explained in the section titled "Special Circumstances" in the Supplemental Case Narrative.

The e-mail from the lab to Auxier with the revised pages for the reports for Work Orders 14-04065 and 14-04066 did not include any explanation as to why the revised pages were being provided. I presume it was in response to an issue identified by Auxier during data validation but that is only an assumption on my part. I have sent out an inquiry on this issue and will let you know as soon as I hear back.

Paul, why were the analytical reports included with this monthly report revised?

Attached is the monthly report for OU-1. Due to the size of the files for the analytical laboratory reports for the air samples, we will be submitting those via WeTransfer file transfer service. Shawn, I will post them to the MDNR ftp site when I have a chance.
